Comments: My concerns with the proposed Tell. Mtn. Club Sheep Mtn. Traverse Trail are many. The Trout Lake, Lizard Head and Lake Hope areas are experiencing exponential use and impact beyond the managing entities ability to provide a sanitary and compatible environment. Adding another trail to an overloaded system is not a viable solution to the existing problems which include: inadequate rest rooms, parking congestion, Trout Lake County Rd. safety issues, and impacts to the bordering Trout Lake PUD. Before any added recreation amenities in our area are reviewed, let alone approved, it is imperative that all concerns are resolved. It also seems redundant to add a trail that basically parallels an existing USFS dirt road beginning and ending in the same place.
