Title:

Comments: While I am not a resident of Cooke City or Silver Gate, I do spend several weeks a year in the area. I support the project with hope and trust that the methods utilized will both reduce overall risk and protect the forest for generations to come. The area is way too precious to employ means which are destructive or disrespectful of the rest of us who value the beauty and enjoy recreating. If this can be accomplished and satisfy the objectives of the project, then I fully support thoughtful efforts of the project. Thank you.
