Comments: I am strongly in favor of a shuttle stop at Chantry Flats. That area constantly struggles with parking congestion. A shuttle stop could alleviate that issue without requiring more parking to be built. Providing an alternate means of accessing trailheads will promote equity in access to the nature in the Angeles National Forest as we cannot assume everyone has easy access to a vehicle. For me personally, I share a car with my wife, and a shuttle would allow me to go hiking without stranding her at home for the day.
