Comments: I believe the FS should approve this special use permit for the Holland Lake Lodge as it has been a complete mess for the last several years. I would, however, like to request that the Lodge be required to observe some sort of quiet hour restriction on their noise from weddings, reunions, and special events. The last several years the Lodge has been flaunting any neighborly noise reduction. My family has a FS lease recreational cabin directly across the Lodge, we have been there for nearly 40 years. As you know, sound travels across water very well. On several occasions when the noise from weddings was particularly offensive, we would call Christian to politely ask for him to tone it down a bit. Invariably he would rudely respond by telling us it was a private party and we had no business telling them anything. Rest assured, there is nothing quite like waking up at 2 am and listening to a bunch of drunks cheering on Michael Jacksons song Beat It. Im certain the adjacent campground visitors got an earful as well. This needs to stop. If you approve the special use permit, I would request some limits on their noise - a 9 pm shut down on the noise would be a preferable compromise. Thank you
