Comments: I'm writing to oppose all versions of the Targhee Expansion plan. Many people will comment on the potential bad luck effects on wildlife, dark skies, road traffic, etc. While I share these concerns, I also oppose expansion because it simply is not necessary. I am an avid alpine skier and I think Targhee has enough terrain & lifts; it is never crowded. The limits to skier visits are: accessibility for out of town travellers, fog, and increasingly, poor snow conditions. I am a full time resident of Driggs and I ski fewer and fewer days because the snow has been getting wetter and heavier. With the unfortunate trend towards warmer winters, I don't expect to see many more days of Targhee classic champagne powder. Expansion would be futile effort of throwing away forest resources and community resources. We should be there taking care of the forest we have, while we can, instead of tearing it up for this ski resort. And we should take action that is in the interest of most of the community. I urge you to deny any expansion approval for Targhee. Thank you for your consideration.
