Title:

Comments: I'd like to see a recreation benefit within the Hyalite recreation emphasis area. This project, currently, does not create any needed infrastructure or trails. Nor does it improve or legalize the trails already within this project area. This area, and our entire Bozeman area, specifically lacks directional, mountain-bike-only trails. Our community deserves continued growth in our trail and recreation systems, and I'd like to see a plan attached for the maintenance, improvement, and overall growth of recreation alongside this proposal for hazardous fuels reduction.

If these goals are not going to be met, I'd like to also see information on how existing trails in this area will be maintained and not degraded during this process.
