Comments: I am staunchly in favor of utilizing federal lands for the local use, enjoyment, and beautification of Teton Valley. Getting more access and amenities in our backyard is an amazing thing that will help the continued success of Teton Valley. While I recognize that some have concerns about allowing a private company to profit from our public land, this is an investment in America and will allow American's more access to well maintained public lands. Teton County, Wyoming is 97% federal land, appropriating 1700 acres out of close to 5 million acres of conserved land for further recreational development is a literal drop in the bucket and will increase conservation efforts, not harm them. This is the exact sort of project needed to bring in trusted stewards who will be responsible for the maintenance, upkeep, and access is an easy trade off for me. LET US USE OUR PUBLIC LANDS RESPONSIBLY!!
