Comments: Dear Ranger Dowling,

Please have your interdisciplinary team conduct an environmental assessment with full public involvement for the East Valley fuels reduction project. I am a retired forest hydrologist/meteorologist/air quality specialist who fully supports my brother Keith in his work to protect all life in so far as possible in the Flathead and Swan Valley, especially along the Swan Mountains. Please fully engage with Keith in working for a community decision which fully implements all views, including those unspoken by human voices, wildlife. Thank you!
