Comments: E mountain bikes should not be allowed to ride on all trails. If they are, this will lead to Class 2 bikes and riders tearing up our trails as the ice motorcycles do. How will these riders be kept off our trails? How will our trails be monitored? I constantly witness many e mountain bikes on trails that are not allowed. Large groups of e mountain bike riders constantly ignore signs prohibiting them from riding. There are a plethora of very powerful class 2 e mountain bikes available that will make our trails almost impossible to ride.

I use our rec paths regularly and witness many class 2 bikes passing at dangerous blind corners. Monitoring the rec paths are non existent, same for our mountain bike trails.
