Comments: It appears that this EIS includes what is needed but lacking detail on lack of infrastructure on how it would impact the town of Driggs and the lack of infrastructure at Targhee.

Been skiing there for years now and the lodging and parking can barely support the busy weekends.

I think a more graded approach should be taken. Improve parking and expand the plaza area prior to doing new lifts hotel and restaurant. Also, the city roads in Driggs can't handle the influx of people. The highway needs to be expanded between Teton and Driggs and between Victor and Driggs. Targhee ski resort and Teton county need to work together on the infrastructure to the resort to support the future population of skiers prior to expanding the resort.
