Title:

Comments: I have spent many days skiing in the South Bowl and contrary to the statements in the EIS study, I have never seen rescue in the South Bowl. I oppose lifts in the Mono Trees forest and South Bowl. The Mono Trees are are pristine old growth forest. The South Bowl should remain a back country access to preserve the integrity of Teton Canyon. I support night skiing with a restriction of 7pm closing to respect dark skies. I do not oppose a restaurant at the top of Sacajawea lift. If there needs to be expansion to accommodate more skiers, I believe the area North of Blackfoot makes the most sense.
