Comments: Thanks to all for your work on this project! I would like to ask for help in keeping the Forest service road 382 passing by and providing access to my residence in acceptable condition during this project. I have spent a considerable amount of time and money upgrading the portion of road 382 leading to my residence in the last few years as my part of the road agreement with the Forest Service. Last year I had the road crowned to prevent the damage caused by heavy rains. This improvement was degraded over the last few months with the logging in the area. Once this project is completed would there be a possibility of getting the road back to a crown condition to prevent erosion of road? Also during this project could some type of dust control be used on the road adjacent to my property? Thank you for your consideration.
