Title:

Comments: The scoping letter says, "the proposal includes operating 7 days a week, from June through October each year", however in section III.B of the Terms and Conditions of the existing permit, or the "Period of Use", it states that the "use and occupancy authorized by this permit shall be in normal operation at least 153 days each year or season (June 1- October 31)." The terms of the permit seem to allow for year-round operation. My concern, since the permit also allows for a separate outfitting permit, is that this opens the door for the Lodge to become a hunting basecamp, introducing potentially a large number of hunters to an already heavily hunted area. If the intent of the new owners is truly to operate from "June through October each year", the permit should be amended to restrict their use to that timeframe.
