Comments: I am agreeable to the proposal stated in the FNF letter dated April 7, 2025 to grant a 20 year permit with the existing use, footprint, and facilities of Holland Lake Lodge. With this permit and no expansions, an environmental exclusion is justified. If and when a permit revision is ever submitted, that includes any type of expansion, then an Environmental Impact Study, or possibly an Assessment Study, must be required. If any such expansion is ever requested, the Flathead National Forest should also undertake its own impact study to determine how it would respond to and manage any increased public activity in and around Holland Lake as a result of any such request. (Public use of the Lake and the adjacent recreation sites and opportunities is already at an overload level during summer months.)
