Comments: Please stop destroying this beautiful planet and all of Creation that depends on it.

Once again it is deeply disturbing that there is little to no understanding of other cultures & their beliefs - remember the outrage at the thought of disturbing 'the sacred ground' where the Twin Towers once stood?

Traditionally this and all of the Black Hills have been sacred to many tribes, I urge you to respect that, as you would if it were a Christian cemetery full of Caucasians.

Thank you.
