Comments: To whom it may concern:

I am not opposed to the project as described, as long as the below are taken into consideration and incorporated at the earliest opportunity:

- 1 - The barracks footprint becomes badly needed parking spaces as soon as funding is available.
- 2 - The implementation of the shuttle stop does not impede the flow of traffic through the narrow corridor that exists in the proposed location. It is effectively a single lane width and there is already a bifurcating of traffic immediately east of this site for the Adams Pack Station's automobile gate.

Thank you,

Brent Pepper
