First name: Desir&#233;

Last name: De Vries

Organization:

Title:

Comments: Please do not follow through with this project. This land is sacred and not only that, but your plan will destroy the ecosystem of our beautiful black hills and surrounding areas.

Isn't the world becoming toxic enough as it is? And you want to contribute to that? What about your daughters and your grandchildren? Do you really want to leave your homeland destroyed and more toxic for them?

We are all breathing this air, we all drink this water, we play in the creeks with our children and grandchildren. Please think about what this will do to the future...to the health of everyone who lives here...including you and your family!

And lastly, please extend the comment period. It's unfair that you only give until May 9th.

Pete, please don't do this ??
