Title:

Comments: The proposed project is aberration against decent society. Using sacred land is not okay. Using Lakota land is not okay. Felling trees in the area is not okay. This entire proposed project is nauseating and wildly inappropriate for a civilized society to even entertain the idea of. End the whole thing. Stop ripping our environment apart. Stop trying to make oil spills everywhere a thing. Stop taking the land of the Lakota people, respect their sacred land! Just because you CAN do something doesn't mean you should. Whoever works on this has no soul. Too much has been taken from our indigenous people already and the idea of taking more is nauseating to even think, for those with a soul or any decency.
