Comments: To whom it may concern (it should concern ALL of us). I am deeply concerned that a mining project is being g proposed through a sacred site known as Pe'sla to out Lakota relatives. This a scared place of prayer and gathering for many other tribal Nations. Free, Prior, Informed Consent. Have the Tribal Nations been contacted about this proposed project? When will we learn that all of our families and generations to come will depend on the very land, water, plant, and animal relatives we put at risk with these ongoing mining and extraction projects. I do not support this project.
