First name: Jeannie

Last name: Bush

Organization:

Title:

Comments: Please:

1. extend the comment period so that you have a better number of people able to give valuable input.
2. do a full EIS ~ this is needed so the decision made is based on fact, not in-the-moment opinions
3. I appose the Rochford Mineral Exploratory Drilling because it uses copious amounts of water that we do not have to waste; it threatens the amount of our present water supply; it endangers clean water; it serves only the mining company and dollars, not the other hundreds of users of the USFS (birders, hikers, wildlife, hunters, fishers, cycling, botanists, and many more); but most of all, it threatens the sanctity of the Pe' Sla.
4. do a full, meaningful Tribal Consultation
