Title:

Comments: This project would bring no real benefit to anyone but those who own this company. It is set to harm land that is sacred to the indigenous people of this area and by harming it, we are only proving our continued disregard for the rites and rituals and what is important to them. We must not continue with this and other projects of this nature. I request a 60-day extension of the public comment period, as well as an environmental impact statement. Please don't continue to harm those who have borne the brunt of our need for energy and land.
