Comments: Targhee Comment - Support for Alternative 3

I'm writing as someone who loves Grand Targhee and values its role in our community. The resort already offers a great experience with over 2,600 skiable acres and recent lift upgrades. There's no need to expand onto public lands.

I support Alternative 3: No Special Use Expansion. It allows for in-bounds improvements-like a new lift and base upgrades-without harming wildlife, dark skies, or public access.

Expanding into South Bowl and Mono Trees would damage pristine terrain, limit non-skiing recreation, and impact views from Grand Teton National Park. It's also opposed by park and wildlife officials.

This project could increase traffic, housing pressure, and the risk of a corporate sale-shifting Targhee away from its local character.

Public land should remain public. Please choose the responsible path and support Alternative 3.

Thank you.
