Title:

Comments: public comment on lost rier project i am opposed to all logging of trees, thinning of trees, hemiccal applications of toxic substances in this livingarea, and any new roads or trails that you want to build. such trail building road building destroys habitat for nature and kills it. i am for wilderness and nature at all times. mankind simply cannot do the job nature has done for america. these assaults by this agency are not appreciated. i am for nature 100%. every project i have seen that these govt agencies touch, the site is worse off than if it had been left alone. moneymaking is what this agency does. spend money so we get money. maybe cutting the tax dollars to this agency will help you stop assaulting our forests. the forests belong to the public. this agency does not listen to the pleas of the public to stop the assault on nature for money and profiteering. all of us must respect nature. jean publiceejeanpublic1@gmail.com, i do not approve of this plan.
