Comments: Please provide a 60 day extension of public comment and conduct an Environmental Impact Statement for this proposal. I strongly oppose the proposed 18 drill pads on behalf of the health of my children and their children. The fact that this project is being considered partly inside Pe' Sla's protected area is so short sighted. Clean drinking water for our children should be our first priority and this project threatens the Rapid Creek and groundwater with contamination and is an attack on the treaty rights of the indigenous people working to protect the land.
