Comments: Dear Supervisor Sanchez, Your Encino Vista Restoration project is a misnomer as there wont be any restorative value , just more wanton and reckless burning and thinning that has resulted in disastrous results like Cerro Pelado ,Hermits Peak , Calf Canyon uncontrolled burns , as well as all the destruction of beautiful forest ecosystem that I am witnessing below Santa Fe Ski Area and Pacheco Canyon.....One would have to wonder if there isnt some big fiscal reason that these kind of projects continue to be funded by our tax dollars?I know you wont pay any attention to people like me that dearly love our forests and feel you are on the wrong track but its important to me to speak out for the forest and all its inhabitants ...hopefully you will realize all the harm you are causing at some point .You can use science as a justification for all these projects but its increasingly clear that your Scientific experts dont' know everything about how to manage wildlands that did fine for centuries before experts intervened to "fix" them .Sincerely ,Mr .Page Press
