Title:

Comments: This plan is a brilliant blend of wildfire mitigation and recreation enhancements. The 63 treatment zones in 1200+ acres is detailed well thought out. The Town of Frisco's significant involvement For both trail enhancement and maintenance is a testament to the benefits this plan brings to local residents. The winter trail plan of snowmobile grooming is a significant benefit for dog walking, winter travel and snow biking. Removing standing and fallen dead trees will improve the overall recreation experience. This management plan needs to be shared with the property insurance industry to demonstrate how homes in the wildfire interface zone can be safe and should not be subject to extreme insurance premiums.
