Comments: Thank you for hearing my input and that of folks like me. While my 70's find me healthy and energized, my stamina, muscle strength, lung power and heart are no longer 50 or 60. Try as I do I can't go the distance as well. Thus an Ebike has been a way to stay more fully and respectfully engaged. If your parents were here and able to join you on a hike or bike ride with a bit more assist, what would you say or do. What will life look like for you as your body ages? I have personally encountered 2 youth bike groups on the trails going so fast I jumped off (going up-them coming down) I slipped down the embankment. The fine gents and coach apologized profusely. Shaken on we went. My point? Is it speed and courtesy that are the issue? What is really standing in the way of moving to a more open mentality. I'm more than happy to apply for a reasonable accommodation tag, if you'd set that up. Such as the uphill permits at Copper. I, like others, respectfully ask for your reconsideration. I pay very hefty property taxes in this county and ask for your assistance in my utilizing our shared lands. No one Owns them, they are Our shared ancestral lands. We are simply requesting you assist in that honoring the sharing of the gifts if the land.
