Title:

Comments: I am an e-bike rider and have been enjoying the peninsula very much.

It would seem like an obvious thing to add the backyard as an e-bike friendly

Addition..

I know that they have been accepted in many areas and have proven to add to peoples

Enjoyment without causing any more issues to the trails than any other bikes.

If there are some administrative issues with getting permission I know these can be

Overcome as they have worked it out in many other locations.

I have asked many times when confronted by others what is your issue ?

The only answer that I have ever gotten (if I am riding in a questionable area) is

" they are illegal " or against the rules. It is never a real or perceived issue that is different

From an issue that can (and does) occur with any other bike. Ie. rudeness, lack of courtesy,

Too much speed, bad passing, poor use of breaks, etc.

Riders need to have respect for others independent of their means of transportation.

This includes feet,horses,mtn bikes , fat tire bikes, unicycles, boards, e-bikes, and any other

Non-disruptive means of having a good time

Thanks for your attention.
