Comments: I am writing to say that I oppose the drilling of the indigenous sacred land Pe'sla. Not only do I find the proposal to be a horrible violation of indigenous rights but clear cutting these forest's would have detrimental effects on the local environment and our worlds as a whole. We need to be protecting our watersheds and delicate ecosystems that these lands provide. We have destroyed too many lands and environments to explorative drilling and the communities surrounding these areas are the ones who pay the largest price. Please oppose and fight this.

Thank you
