Comments: To Who It May Concern,

I oppose the 18 drill pads inside Pe' Sla's protected area because it would be bad for Earth, it will violate the people there, their treaty rights, and it's bad for their land. It's their land. I request a 60 day public comment period and for the RMEDP'S and/or whoever can do this, to provide an Environmental Impact Statement. This is also no common sense to do this. Earth has to be here.
