Comments: Hello! I'd like to offer my support of this project. Trail infrastructure will contribute a lot to this area, and I feel strongly that this project will support the Mammoth Lakes outdoor community, our youth, and the tourists visiting the area looking for responsible recreation. The use of this area has increased drastically in the last few years/decade, and these improvements will go a long way toward "catching up" with the use that is already in place. Moreover, responsible trail routing will contribute to less erosion/environmental damage than the "bandit" user trails that crop up in this area when formal projects like this don't exist. Thank you to the USFS and the Mammoth Lakes Rec Dept for all of their work to create spaces like this in our community!
