Comments: Dear Project Decisionmaker - I heard through an email from the BWAGs that winter operations could result in plowed roads that forego cross country skiing opportunities. However, winter operations can also have less impact on soil compaction and other resources. What is important to me is that this project proceeds in the most cost effective, expedient fashion with the least environmental impact. Please consider allowing winter operations if it would result in a shorter duration project that is lighter on the land. I think there are plenty of other places we can cross country ski in the interim. Sincerely, Pam Bode
