Title:

Comments: Once again the same people are making a play for the Holland Lodge and the plan is very short on details. There have been no plans for replacing the wastewater system. An illegal fence on public lands has been built on public lands. The required Operating Plan doesn't name a permit holder or include a management structure. What are their plans for the Lodge usage? The USFS thus far has no answers for it. The draft operating plan should not be permitted to change without public input. Without full disclosure this plan should not go forward. Without it I say Hands Off Holland.
