Comments: I fully support any and all efforts to expand and diversify access to these public lands. They are vital to the surrounding communities. As an avid OHV park user, I respect the land and want to see it preserved and maintained for future generations. I have volunteered countless hours providing maintenance and repairs to the trail system in the OHV park. I don't hike or bike often, but I also support additional trails for those uses. This is a beautiful area and expanded offerings like more camping and trails would provide more opportunity for people to enjoy this area of the park.
