Comments: Thank you for completing and sharing the Carbon River EA. It's not clear how you will decide between the two Alternatives and I do not see that one is recommended over the other. However, as a local who uses some of the area for recreation and values wildlife habitat and biodiversity, as well as someone familiar with timber harvest through my career, I support either of the two proposed alternatives -- certainly over doing nothing at all. Will you still have the money to proceed, given the current administration and gouges in federal budgets and the FS workforce?
