Last name: Gronenthal

Organization:

Title:

Comments: When the last tree is cut down, the last fish eaten, and the last stream poisoned, you will realize that you cannot eat money. If you think that we are far from that...you might want to think about where 80% of the world animals have gone. When did you last see a wolf? Bear? Mountain lion? Moose? 75% of species are extinct. That's in 100 years.
