Title:

Comments: I would ask that you consider alternatives to the closing of the Gordon Pond Trail. It is a scenic and wild trail that can absorb hiker travel with little impact on its surroundings. The WMNF needs quieter trails as alternatives to its overused ones.

Access and parking appear to be the issues, not the trail itself. There are road intersections (Reservoir Road) and small parcels that could be acquired in part or as a whole, or easements obtained, to provide parking and access. Please consider these options going forward.
