Comments: I am pleased to see the actions being proposed in the Forest Wide Thinning & Potential Control Line Treatments #65884. As a forester myself, I'm very aware of the benefit (and harm) that can come from these types of treatments across a forest landscape. The way this is proposed is far from unsustainable, and will in fact benefit the forest, wildlife and overall ecology of the treated portions of the GPNF. Additionally, having witnessed the control line treatments in action (Nez Perce NF), I have first hand accounts of their effectiveness in both wildfire containment, and beneficial ungulate habitat creation. This proposal is encouraging as both a forester, and resident of Skamania County.
