Title:

Comments: There should be no permit issued at this time. The applicant needs to submit a Master Development Plan before a permit is issued and the Plan needs to undergo agency and public review and comment. Show the public the owner's new operating plan not the previous owner's plan which is irrelevant. The repair of the sewer and the sewage system must be part of the Master Development Plan and permitting. Quit trying to shield the applicant and the future plans from public scrutiny. We have a right to know what's going on and to comment on it.
