Comments: There is NO way that public lands should be used by private corporations to do whatever they please w/o a plan of action or any action. they dont own it & never should.

The State of MT should all b public lands for people to enjoy by not limiting the use to make money.

Holland lake cannot handle abuse to destroy its beauty and public access.

No more of this give us your money and do whatever you want to make more money which costs us way more in the long run.
