Comments: Will 7726 and 7720 forest roads be updated for clearance, erosion and drivability, if the fuelbreak by Cedar Lake is approved, along with the proposed Celery Meadows TH vault toilet? The road to the fuelbreak on 7726 can be steep and rocky. Must have a 4x4 to complete the final section before reaching the Cedar Lake overlook. Also, will the primitive toilet at the Celery Meadows campground be updated? It was updated about 5 years ago, but unsure if it has been maintained since then.
