Comments: I would like to write this letter in support of the expansion of Grand Targhee ski resort currently in the United States. We have very few resorts that are open and when you compare us to Europe, we have almost no ski resorts. This is kept the supply low and the price is high grand. Turkey has an amazing opportunity to expand access for millions of people to experience. The joy of the national forest to limit its expansion will limit the ability of millions of people to enjoy our national forest. Additionally, we know that this will not impact habitat or the survival of any endangered or critical species there as there is plenty of room in that place for everyone this is a very teeny tiny area of the national forest so I am 100% for all the expansion For grand Turkey because this offers the maximum ability for people to enjoy the wonders of our national forest
