The Caribou-Targhee National Forest is considering Targhee's proposal to authorize massive new development on public lands, including new lifts, roads, and infrastructure in critical habitat for grizzly bears, Canada lynx, wolverine, and bighorn sheep as well as treasured terrain for winter recreationists.

The Caribou-Targhee National Forest has released a Draft Environmental Impact Statement (DEIS), analyzing Grand Targhee's proposals. Winter Wildlands Alliance opposes this expansion, and generally supports the win-win scenario in Alternative 3 in the DEIS which would authorize new trails, lifts, terrain development, and other projects within Targhee's existing footprint.
