Comments: To Chris Dowling,

Thank you for listening to concerned citizens. I trust that you are trying to do the best for the taxpayers.

Please do not issue a 20-year permit until you see the Master Development Plan and it has had agency and public review and comment!

Please don't pass the new owner's permit off as a renewal of the previous owner's 2017 permit. The business became unprofitable, and the sewer and sewage leaked.

Please show the public the new owner's 2025 Operating Plan.

The repair of the sewage system must be part of the permit process.

Please provide an environmental impact statement.

And did not use a categorical exclusion.

Thank you for your attention to these manners and for doing your job as a public servant to everyone not just to a private interest group.
