Comments: I am writing with a deep concern about future

Drilling projects that would impact sacred Native sites as well as potentially cause contamination of the Rapid City Watershed.

I am asking you to respectfully withdraw from any plans to cause further harm to sacred Native sites and to protect our water. We are already in a bit of a drought and we rely on a limited source of water so it would be insanely unwise to do anything to jeopardize that precious resource as much as it would also do harm to the already strained relationship with the local Native American community.

Just don't.
