First name: Jonathan

Last name: Miller

Organization:

Title:

Comments: The area that has been outlined for this project is legally protected land that is both culturally and spiritually significant to the local indigenous American people and to the Oceti Sakowin as a country. Another site needs to be chosen in cooperation with local leaders, and if no other site can be found, this project should be cancelled. Graphite and profit margins are not worth risking contaminating water sources and ignoring the wishes of the rightful legal owners of the land.
