Title:

Comments: I now live in MN but I have family from South Dakota. It is a vast and beautiful land and one I want preserved for the future. We can do better than to destroy it because we want to live beyond our means. Recycle, re-use, garden, even simple things like turning off the lights in empty buildings at night or not purchasing the new iPhone just "because" when last years model works just fine etc etc. There are so many other ways we need to do better. We DONT need to drill. Our grandparents would be embarrassed and you know it! I trust you to do better! PLEASE no more drilling or destruction in the Dakotas.
