Comments: As a long time trail runner in Tetón Canyon, I can attest to the fact that it is more crowded, there is less wildlife, the traffic on ski hill Road has increased 10 fold...Never before these past few years have there been traffic jams during the winter as skiers wait to potentially park...I believe capacity has been reached as far as Targhee expansion is concerned... our quality of life has already been impacted! Where does the wildlife go when their territory is further invaded?! I am a road biker... climbing up to Targhee used to be great.. now so much traffic and trash...This has not been well thought out and the priority is money not habitat protection or quality of life! A hearty NO!
