Comments: As a long-time camper, kayaker and hiker at Holland Lake, I would like to weigh in on the proposed 20-year permit.

Most important is that a permit should not be issued until the Master Development Plan has undergone agency and public review and comment.

The public needs to have participation in every step of the permit being granted, and have access to all documentation, and a right to comment.

The new owners must agree to accept the cost of bring the sewage system up to code.

Please keep Holland Lake pristine and accessible to all.
