Title:

Comments: The South Cottonwood drainage must be protected from logging or any significant changes in its' essentially intact, partially old growth, ecologically sound condition. This special reserve of wild lands close to a fast growing city will become more precious and more sought after as the years bring more folks to seek recreation in such increasingly rare accessible areas. I am pleading with the Forest Service to abide by the original mandate and focus on protecting and preserving our beautiful Cottonwood Canyon. Please respect the future of the forest rather than cater to the wishes of corporate logging interests.
